Model 1118E outdoor centralized mail delivery system is constructed of corrosion resistant aluminum and stainless steel. Concealed hinges on front-loading master doors Type II, III, & IV (high security hinge on Type I) provide easy access for mail delivery person. Doors are designed to stay open while mail is distributed and to close quickly when released. Baked on gray powder coat exterior finish resists chips and scratches for years of maintenance

free operation. Interior compartments are .080" aluminum. Shelves are secured with stainless steel rivets for strength and stability. All patron doors are equipped with weather resistant 5 pin cylinder cam locks (1000 changes) and 3 keys. Parcel boxes have 306P captive locks. Standard door identification is a 1" x 1" aluminum tab with black numbers. Tab recesses into an indentation in the surface of the door for a smooth attractive finish.

Why Canadian Locker?

Quality mailboxes, personalized customer service, competitive prices, and unsurpassed lead times.

Canadian Locker offers mailboxes designed for optimum durability and maximum security.

A wide selection is available, including horizontal and vertical mailboxes for apartments, cluster box units (CBUs) for neighborhoods, and locked mailboxes for residences.

Canadian Locker also offers mailboxes for mail delivery and universities, schools and private mail centers.
